RELEVANT EXPERIENCE

UNCC Web Development Bootcamp Student Forum
Live: unc-bootcamp-forum.herokuapp.com/ | **GitHub:** github.com/DrBailey13/BootcampForum
Built in collaboration with four web developers who wanted to connect all students enrolled in FT and PT courses to discuss homework, resources, job information, etc. they wish to collaborate on.
- **Project role:** Frontend design, responsiveness, Handlebars files, JavaScript. In detail, I designed wireframe and wrote all frontend code for the forum's appearance; made major design changes to improve user experience; designed logos implemented on site; wrote code for modal and styled for page; researched framework
- **Technologies used**: Handlebars, CSS, JavaScript, Bulma Framework, Initials Avatar API, Sequelize, jQuery, Heroku for Deployment

Gigs & Grub
Live: reeceb96.github.io/EventFinder-Group9/index.html | **GitHub:** github.com/magrimes/GigsandGrub
Allows the user to conveniently search a city in NC and display local concerts and restaurants in return to plan the occasion accordingly.
- **Project role**: Created the frontend, designed the logo implemented on the site; researched API documentation; managed responsiveness for all device types
- **Technologies used**: HTML, CSS, jQuery, JavaScript, Materialize Framework

Note Taker
Live: note-taker-magrimes.herokuapp.com/ | **GitHub:** github.com/magrimes/NoteTaker
Created to write, save, & delete notes using an Express backend and retrieving note data from a JSON file.
- **Project role**: Created the backend and connected it to the frontend; created HTML routes to return index.html and notes.html files using GET command; created a db.json file to store notes created; utilized three API routes: GET, POST, DELETE
- **Technologies used**: HTML, JSON, Express
